EXPERT TEAM ENGINEERS & SKILLED PROFESSIONALS

About EKAS

Founded in 1990 by Eng. Kamel Ageeb, EKAS has spent over three decades perfecting every layer of pool construction — from the first pour of concrete to the final tile. We've built more than 400 private pools and 30 large commercial projects across Egypt.

1990 — Eng. Kamel Ageeb starts private pool contracting

2000s — Operating under the Agibco name — Hundreds of swimming pools completed for private clients and commercial developments.

2017 — The company is rebranded as EKAS while preserving its expertise and construction standards.

Today — 35+ years of experience, 400+ private pools, and 30 commercial projects completed since 2017.

EKAS
Swimming Pools & Landscape

TRUSTED BY DEVELOPERS & PARTNERS

Our Clients & Partners

EKAS has delivered projects for Egypt's most prestigious residential compounds, resorts, and private developers.

Expert Construction

Reinforced concrete techniques – the safest, most durable method for any pool shape.

Pre-Insulation Testing

We test every pool structurally before waterproofing – a practice few contractors follow.

Start Zero Leak

Our goal is simple: start every project the right way to ensure a leak-free pool from day one.

Integrated Pool Systems

Specialized in filtration, water features, and pool systems – engineered for performance and reliability.

POOL ANATOMY

CIVIL STRUCTURE

Every EKAS pool is built on a reinforced concrete structure engineered for strength, durability, and long-term performance.

CIVIL STRUCTURE

01 **EXCAVATION**
Site Preparation

02 **REINFORCED CONCRETE SHELL**
Strong and durable structure

03 **WATERPROOFING SYSTEM**
Multi-layer protection

04 **COPING & FINISHING**
Edges and surfaces

05 **RETURN**
Balanced water circulation

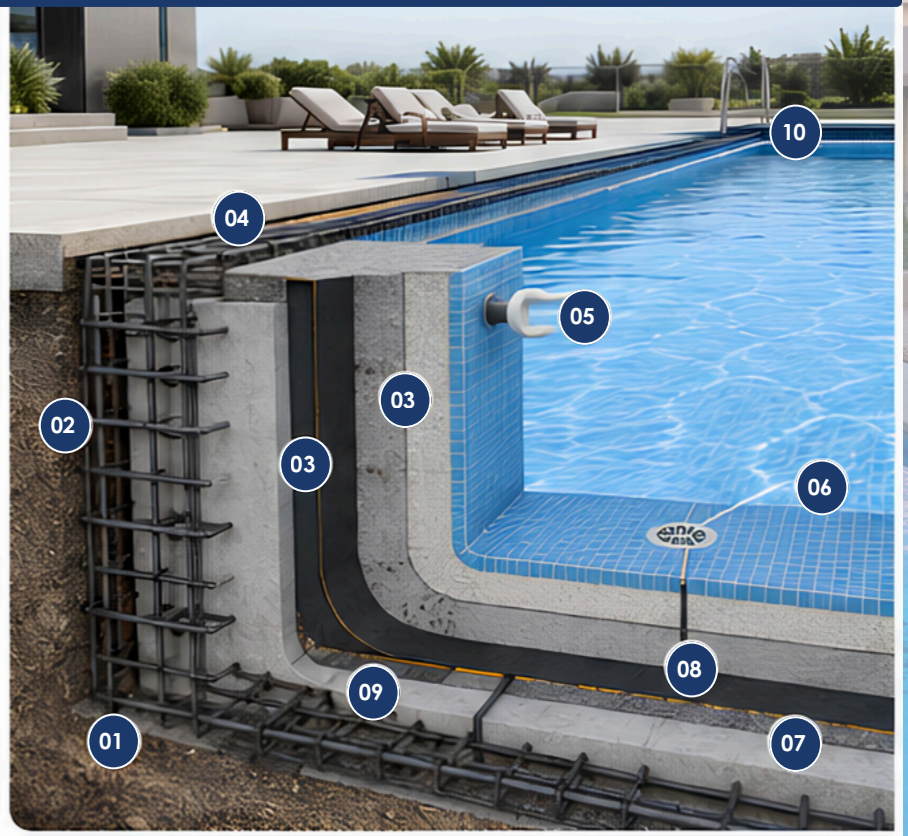

06 **MAIN DRAIN**
Efficient water drainage

07 **EXPANSION JOINTS**
Prevent cracks and movement

08 **FINISHING**
Tiles / mosaic / surface

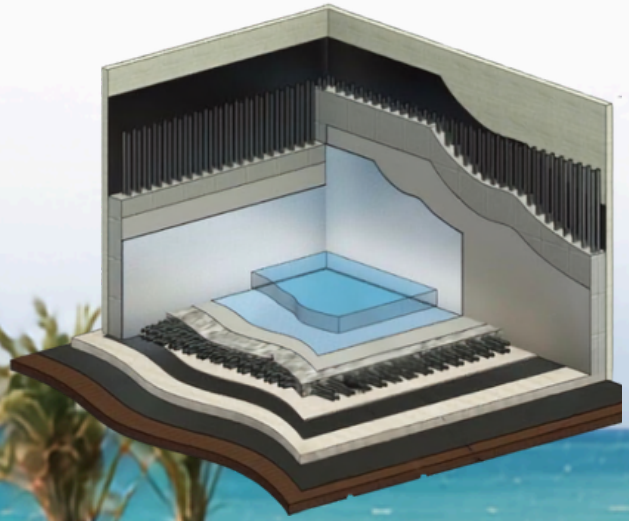

09 **INTERNAL INSULATION**
Thermal protection (as required)

10 **POOL ACCESSORIES**
Ladder, handrails, fittings

CONSTRUCTION TECHNIQUE / LAYERS

Engineered layers working together to create a strong, durable, and watertight swimming pool.

BUILT TO LAST

STRUCTURAL STRENGTH
Reinforced concrete structure designed for long-term stability.

WATERTIGHT CONSTRUCTION
Advanced waterproofing systems for total protection.

PREMIUM FINISH
High-quality tiles and finishes for lasting beauty.

THERMAL EFFICIENCY
Insulation layer improves comfort and reduces energy loss.

JOINT PROTECTION
Water stop systems ensure leak-free construction joints.

ENGINEERED FOR PERFORMANCE
Every layer is carefully selected and installed to perform.

EKAS
Swimming Pools & Landscape

Swimming Pool Construction

Built on Experience. Focused on Quality.

EKAS specializes in swimming pool construction and water features for residential and commercial projects across Egypt.

OUR STRENGTH

“Our clients' positive feedback and the lasting relationships we build — that is our most prized achievement.

Eng. Kamel Ageeb
Founder, EKAS Swimming Pools

TESTIMONIALS

Our Clients Say

Real feedback from real projects.

EKAS exceeded our expectations on every front. The pool design process was collaborative, the construction was clean and on schedule, and the final result is stunning. We have recommended them to three neighbours already.

Ahmed Hassan
Private Villa Owner, Katameya Heights

Working with EKAS for our resort pools was seamless. Their team understood scale — these weren't small private pools, they were large commercial structures — and they delivered on time with zero structural issues.

Project Manager
Boho Resort, Aein El Sokhna

The pre-insulation testing process alone gave us confidence no other contractor offered. Three years later, not a single leak. That says everything about how EKAS builds.
